## DETAILED ACTION

### *Election/Restrictions*

Claims 13-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8. Applicant inadvertently omitted the election of species requirement in the previous Office action. The examiner has called the attorney Mss Cassandra T. Swain on 7/8/2003 for further election of the species requirement. The applicant elected the species of figure 7, which claims 1-3 read on the elected species. Therefore, claims 4-35 are withdrawn from further consideration.

### *Drawings*

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "27" in figure 2 has been used to designate both the dash box and the fin. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: the reference number (22) is described in the specification, on page 8, line 9 but not shown in the drawings. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed subject matter of "the fan" must be shown or the feature(s) canceled from claim 1. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the fan" in line 4. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mira (US 5,661,638). Mira discloses (figures 5-7 and column 5, lines 12-20) a heat sink (20) comprising a

core (24) having a central axis; and a plurality of cooling fins (22) arranged about the core, each fin have a base and a tip (top and bottom edges) wherein the fins (22) are shaped to capture a tangential component of air from the fan (28). Mira discloses (figure 5 and column 5, lines 12-20) that the shape of the fin including a bending (curved) portion toward the tangential component of air wherein the bending portion is along the length of the fin, which includes an upper portion (top edge). As regarding the method of forming the device "the fin is bent", the arc portion of the fins (22) appears to be similar to the claimed product regardless of how the arc portion was formed. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).
